

# SIMPLE, FLEXIBLE ALL-FLASH STORAGE FOR STATE AGENCIES.

Store public data securely, deploy personalized services rapidly.

Now, more than ever, constituents are demanding ever-greater access to services and information online. The expansion of public and private data has created unprecedented challenges for budget and time-strapped IT organizations across the country.

Is your storage technology doing what it can to meet this growing demand? Or is it doing all it can just to keep up? Pure Storage understands the mounting issues state governments face—and why traditional disk-based storage solutions will not solve them.

Use this guide as a quick reference to the real-world benefits of the **Pure Storage FlashArray**.

To learn more visit [purestorage.com](https://purestorage.com) or call **(800) 379-PURE** to discuss your state's unique storage needs.

### ✔ PURE FACT:

Idaho Transportation Department of Licensing sped up constituents' online user experience by 85%, allowing them to exceed SLAs and resolve more inquiries per day.

## PURE IS A BETTER STATE OF STORAGE

Only Pure Storage FlashArray helps you deliver improved online services for constituents while reducing operational costs and simplifying IT complexity:

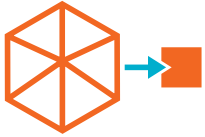

- **Expand storage on demand** to ensure you meet the needs of constituents
- **Fund enhanced services** by measurably reducing existing operating costs
- **Eliminate storage complexity** as you boost productivity and efficiency

## STORAGE MADE SIMPLE

Contract Vehicles include:

- NASPO ValuePoint (formerly WSCA)
- DIR
- CMAS

# The 3 ways Pure Storage FlashArray helps state agencies thrive.

**SIMPLIFIES** public-sector IT with storage that drives continuous availability of online services:

- 99.999% availability ensures 24/7-access to public services
- Simplicity and ease of management allows for greater innovation
- Controller upgrades included in maintenance every 3 years
- Ongoing maintenance and support for all components, including flash
- Eliminates the need for downtime and forklift upgrades

**ACCELERATES** access to (and delivery of) IT services through high performance future-proof storage:

- All-Flash storage delivers a dramatic improvement in application performance over disk
- Enables the launch of apps from a single, powerful storage platform
- Future-proof *Forever Flash* program eliminates forklift upgrades
- Breakthrough performance helps ensure regulatory compliance

**REDUCES** the costs and complexity of public-sector IT with a significantly smaller storage footprint:

- 5-10x more efficient than disk, and with lower power requirements
- Reduces overheads without compromising quality-of-services
- Fewer data migrations means lower risk of lost data
- Flat and consistent maintenance pricing eliminates unexpected costs

## RECOGNIZED BY LEADING ANALYSTS:

Pure Storage has earned 'Leader' recognition from the 2015 Gartner Magic Quadrant for Solid-State Arrays for the second consecutive year.
